

IN THE CLAIMS

Claim 1 (Amended) A wrist rest capable of vertically storing up keyboard, comprising:  
a wrist rest body;  
at least a movable piece, being kept in an interior of the wrist rest body ~~in-way-of-and~~  
~~being able to slide—movable by either sliding~~ out of the wrist rest body ~~and being pivotally~~  
~~connected to—or by pivoting away from~~ the wrist rest body; and  
at least one wall plate, being pivotally connected to the movable piece, being able to  
rotate a preset angle and held in position;  
whereby, the keyboard can rest against the wall plate, which has been rotated to the  
preset angle.

Claim 2 (Amended) The wrist rest for keyboard as defined in claim 1, wherein the movable piece  
is a slide piece that ~~can slide—~~ slides out horizontally from the wrist rest body.

Claim 3 (Amended) The wrist rest for keyboard as defined in claim 2, wherein the slide piece ~~can~~  
~~be—~~ comprises a first slide piece, which is pivotally connected to the wrist rest body, and a  
second slide piece, which is pivotally connected to the first slide piece.

Claim 4 (Original) The wrist rest for keyboard as defined in claim 3, wherein the wall plate is  
pivotally connected to the second slide piece.

Claim 5 (Amended) The wrist rest for keyboard as defined in claim 1, wherein the movable piece  
is a pivot piece that ~~can be rotated—~~ rotates out from the wrist rest body.

Claim 6 (Original) The wrist rest for keyboard as defined in claim 5, wherein the wall plate is  
pivotally connected to the pivot piece.

Claim 7 (Original) The wrist rest for keyboard as defined in claim 1, wherein the preset angle is  
90 degrees.
